EMPLOYMENT

Date 1989-onward at IRPET (Regional Institute for Economic Planning of Tuscany)
Position Researcher on public economics' from 1989 until 2002
Since 2002: Research manager in the areas of public investments, transports, infrastructures and evaluation methods
Since 2010: Head of research unit in regional studies and evaluation methods
Since 2013. Head of research unit in public finance and regional-urban studies

Main activities As senior research manager she coordinates an interdisciplinary working group. She directly supports the Institute's chief manager in planning and coordinate the activity of the institute. She participates in the definition of IRPET program for her area of competence, by collaborating with regional government departments, central and local institutions. She builds up relationships with research centers and international universities.
The research areas she coordinates are:

- Territorial analysis and endogenous resources; Urban and regional economics; Infrastructures and mobility
- Public economy and local finance: taxation, public procurement, federalism, institutions and budgetary constraint
- Program and project Evaluation

Her works are mainly on:
Reports on relevant policy issues and public presentations at local and international conferences.
Models and applied research techniques for the analysis of public policies.
Papers published on many international and Italian review, presented at international and national conferences (ERSA (European Regional Science Association), European public choice Association...).

Several publications and edited books on regional and urban economy, public finance and evaluation.
Chief of complex inter-institutional projects.

She developed in institute and worked on:
public finance, fiscal compact and budgetary constraints, public administration reforms, public procurement, taxes reforms (property tax, business taxes, environmental taxes...), tax evasion; micro simulation and quantitative analysis
transport models, land use analysis, micro-macroeconomic impact models, evaluation models and externalities estimation, experimental analysis.
